

GENESIS+

Reawaken your natural collagen biosynthesis

GENESIS+ is a vegan food supplement developed by NutriZoé, a cellular nutrition laboratory based in Nice, France. Rather than providing animal collagen to digest, it directly provides five amino acids accounting for more than two thirds of the building blocks of collagens I, II and III*, combined with vitamin C, zinc and N-acetylglucosamine.

SilverTech Favourite

SilverEco & Ageing Well Awards 2026, Product Innovation category — presented on 14 September 2026 in Cannes.

New packaging

October 2026: reinforced box, new white and green design, tamper-evident seal.

100% vegan

No ingredients of animal origin. Developed in France, made in Italy.

4.98 / 5

Average rating from 56 verified customer reviews published on vitaminec.com.
